Fuel capacity:	Up to 198 L

SOURCE 22

RAND Source 22 is a true powerboat for all nautical adventurers. With a sporty console, race pilot seats, utility deck and social hangout areas, Source 22 is a highly flexible powerboat giving the opportunity to do anything you want on the water. Source 22 is the fastest electric boat on the market, with a leading green profile in production, making this boat extremely sustainable without compromise on power, comfort, quality, or fun.

Source 22 represents a new approach to sports console boats using a new design language specifically developed for its segment. The design of RAND Source 22 is inspired by the dynamic curves and A-class surfaces familiar from high-end luxury sports cars, the exterior is a subtle play of shadows and taut surfaces, enhanced on the side by a new design element - the infinite loop. The new Source 22 is a testament to style, functionality and raw performance enhanced by the brand's new game changing design.
